**RE: Kentucky American Water
2007-00134**

I am a concerned Scott County resident. I believe all of Central Kentucky would benefit more from the Louisville Water Company Ohio River proposal for many reasons.

Louisville Water has proposed a pipeline that hugs the already heavily impacted I-64 Interstate corridor all the way to Fayette County seems to be the best route.

Long range plans going directly to the Ohio River now, rather than the Kentucky River now, and then eventually the Ohio River seems like a waste of time and money.

Please reject the K.A.W. proposal now before your commission.
